Authorized to work in the United States for any employer

PROFESSIONAL SUMMARY

Production-focused software engineer and product architect with 15+ years of professional development experience building backend systems, SaaS platforms, web applications, and mobile products. Creator of TripFern, a published Flutter application available on the iOS App Store, and Transcribe.plus, a live AI transcription SaaS for court transcriptionists. Particularly experienced with Laravel, PHP, Node.js, Express.js, React, REST APIs, AWS, databases, secure integrations, and taking products from initial architecture through production launch.

PRODUCTION SAAS • PUBLISHED iOS APPLICATION • END-TO-END PRODUCT DELIVERY

SELECTED PRODUCT HIGHLIGHTS

TripFern | Founder & Full-Stack Mobile Developer

PUBLISHED iOS APP

Collaborative travel and memory-sharing platform spanning mobile, backend APIs, cloud media infrastructure, and web administration.

- Architected the end-to-end product across a Flutter/Dart mobile app, Node.js/Express API, MongoDB data layer, AWS storage, and administrative web tooling.
- Integrated RevenueCat, native in-app purchases, Mapbox, OpenAI, AWS S3, facial recognition, authentication, shared trips, collaborative media, and production subscription workflows.
- Owned the complete code-to-shipped iOS lifecycle, including development, testing, TestFlight, signing, App Store submission, release, monitoring, and iterative updates.
- Supported an early user community that has uploaded thousands of travel memories; Android release is in development.

Transcribe.plus | Founder & Full-Stack Developer

PRODUCTION SAAS

Intuitive AI-powered speech-to-text SaaS designed specifically for court transcriptionists and pay-as-you-go professional workflows.

- Built the production platform with Node.js, Express.js, React, AssemblyAI, AWS cloud storage, and Stripe payments.
- Architected secure file handling, transcription processing, account management, metered billing, and customer-facing workflows.
- Processed thousands of hours of transcription and retained multiple customers from launch through the present, including users who replaced monthly-plan competitors with the platform.

CORE TECHNOLOGIES & CAPABILITIES

Backend & Architecture: Object-Oriented Programming, Laravel, PHP, Node.js, Express.js, REST APIs, Idempotent Webhook Processing, Authentication, System Design, SaaS Architecture, Git / GitHub, Third-Party API Integrations

Frontend & Mobile: React, JavaScript, Flutter, Dart, HTML5, CSS3, Responsive Mobile-First Design, App Store Deployment

Data & Cloud: MySQL, PostgreSQL, MongoDB, AWS, S3, Lambda, Render, Netlify, Heroku, Cloud Storage, CI/CD Workflows, Secure Data Synchronization & File Processing

Product Integrations: Stripe, RevenueCat, Native In-App iOS / Android Purchases, Twilio, CallRail, Google API Suite, Meta SDK, Mapbox, OpenAI, AssemblyAI, Unity 6, WooCommerce, Shopify, HubSpot

PROFESSIONAL EXPERIENCE

Cross Catholic Outreach | Web Developer

Oct 2022 - Apr 2025

Boca Raton, FL

- Designed and launched a full-stack educational portal for Outreach Priests, providing secure access to training programs, videos, documents, announcements, and operational alerts.
- Created role-based administrative tools that enabled authorized staff to manage portal users and content without developer intervention.
- Built a webhook-powered donation management and synchronization system with idempotent processing for hundreds to thousands of daily transactions across high-security ecommerce, tracking, and analytics systems.
- Developed and maintained Laravel APIs and backend services alongside React and Node.js/Express applications, translating complex organizational workflows into reliable production software.

PROFESSIONAL EXPERIENCE CONTINUED

Independent Software Development | Software Architect & Full-Stack Developer

Feb 2010 - Present

Massachusetts

- Architect and ship web, SaaS, automation, and mobile products from discovery and system design through implementation, integrations, deployment, analytics, billing, and support.
- Build primarily with Laravel/PHP, Node.js/Express, React, Flutter, AWS, MySQL, and MongoDB, selecting architectures and services around product constraints rather than a fixed stack.
- Use modern AI-assisted and agentic development tools to accelerate implementation while retaining ownership of architecture, code review, security, maintainability, and production quality.
- Maintain production products after launch, strengthening authentication, payment flows, cloud storage, data synchronization, monitoring, deployment, and customer support as requirements evolve.

Gloucester Mass Marketing | Founder & Full-Stack Developer

Mar 2017 - Aug 2022

Salem, MA

- Founded and operated a development and digital marketing agency building websites, landing pages, ecommerce experiences, and automated customer-acquisition systems for small businesses.
- Owned client discovery, technical architecture, development, deployment, analytics, optimization, support, and long-term account strategy.
- Developed database-driven PHP/MySQL applications and JavaScript interfaces integrating lead intake, email, analytics, ecommerce, and advertising workflows.
- Managed more than \$100,000 in Facebook/Meta advertising spend, connecting software and user-experience decisions directly to acquisition, conversion, and revenue performance.

Shawmut Communications Group | Head of Variable Data Development

Oct 2015 - Feb 2018

Danvers, MA

- Led research and development for variable-data technologies, database-driven personalization, workflow automation, and high-volume output systems.
- Partnered directly with prospective and existing clients to translate campaign, data, and personalization requirements into practical technical solutions.
- Co-created an internal Node.js database analysis application and automated processing for CSV, XLS/XLSX, DBF, text, and SQL data sources.
- Engineered conditional-content systems supporting projects with 30+ logical conditions and more than 700 possible personalized message combinations.
- Integrated the Handwriting.io API to generate batches of 1 to 10,000+ personalized handwritten PDFs from client-supplied datasets.

ADDITIONAL PROJECTS

SkillBound | Software Architect & Full-Stack Developer

IN DEVELOPMENT

- Designing an AI-powered gamified learning platform with a Laravel backend and Flutter mobile client, including skill trees, lessons, quizzes, challenges, projects, XP, achievements, and unlockable progression.
- Architecting structured AI-generation contracts, background jobs, staged content creation, completion workflows, and reward systems for a maintainable production foundation.

BitMinky | Game Systems Developer

IN DEVELOPMENT

- Building a Unity 6 / C# cozy farming RPG with modular farming, inventory, progression, quests, economy, NPC, save-state, and offline-progression systems.
- Designing data-driven gameplay architecture that supports new crops, recipes, rewards, locations, and progression content without tightly coupling individual systems.

EDUCATION & PROFESSIONAL DEVELOPMENT

Independent Technical Education | 1,800+ hours of structured programming and web-development coursework; continuous daily study | 2007 - Present

Professional Conferences | Frequent attendee, including Laracon and growth, development, and technology events

Computer Science | Wentworth Institute of Technology, Boston, MA | 2012 - 2014

ADDITIONAL ACHIEVEMENT

First-Degree Black Belt | Earned after nine years of dedicated training and travel throughout the United States for advanced testing.
